**MVP
STUDIO**

To Whom It May Concern:

This letter is a reference for Jayarani Thomas who recently completed a Test Analyst internship at MVP Studio.

MVP Studio is an incubator for early-stage software businesses. It assists entrepreneurs to create an early version, or Minimum Viable Product (MVP), of their intended software product through a proven development process. This enables them to validate the market-fit of their product and launch it into the market. MVP Studio also offers a well-structured internship to qualified candidates, providing mentorship from our core team, so that interns can gain first-hand experience within a commercial software development process.

Jayarani has been with MVP Studio from 23-Oct-2023 until 13-Oct-2024. During this time Jayarani have contributed to the Mars QA project as a Test Analyst. Mars QA is the testing subdivision for Project Mars; a cloud-based social-media platform that allows users to trade skills with each other.

The project is using

- Postman
- NUnit
- Selenium Webdriver
- .NET Core
- SpecFlow
- JMeter
- API
- Manual Testing

Jayarani has worked with us throughout three sprints and has completed the tasks of Create Test Cases & Specflow Automation, Selenium Automation, Manual & Automation Selenium, the outcome of the tasks is completed with excellence.

Jayarani has been:

- Actively following our instructions and learning.
